

# 'Creating an Animation in Photoshop'

1. To create an animation, your images need to be as a numbered sequence. You should edit any failed or unnecessary images out.

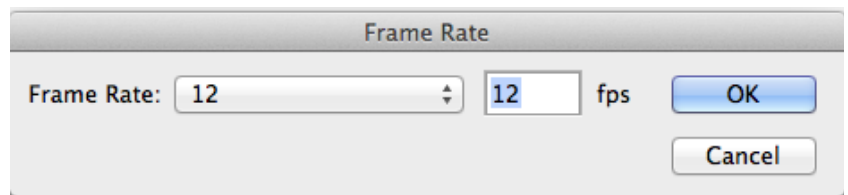

2. In Photoshop go to File>Open. Select the first image of your sequence.

3. Tick the "image sequence" box under the format dialog

4. Press Open

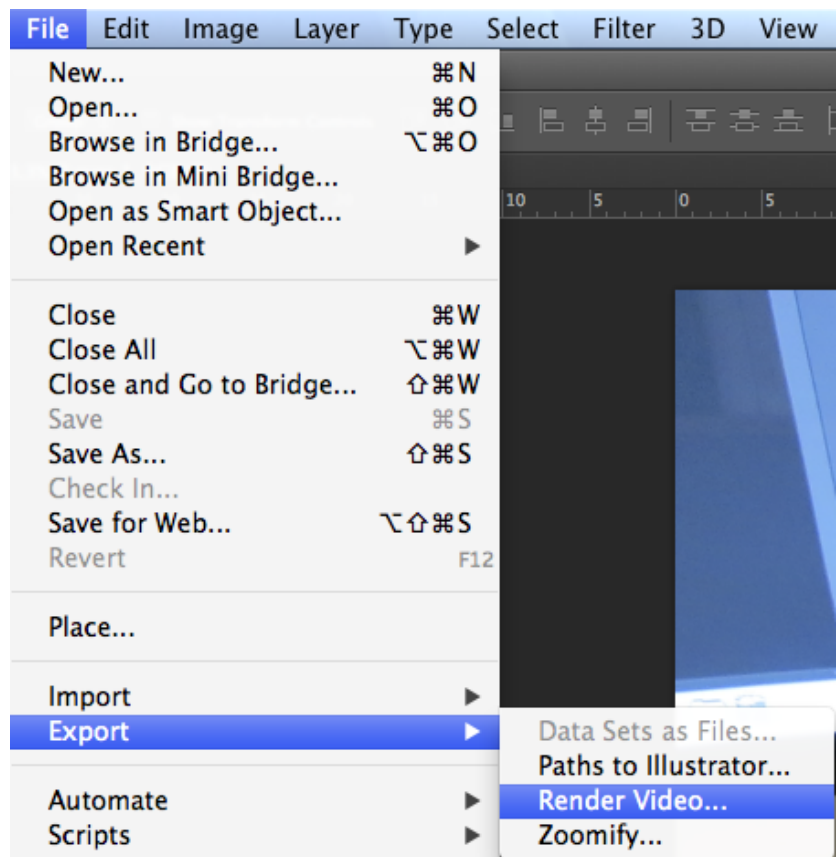

5. A Frame Rate Dialog will appear. Use the following settings.

6. Photoshop will open your animation. You will not have to do any editing in Photoshop so we can go straight to export.

7. Go to File>Export> Render Video

# 'Creating an Animation in Photoshop'

8. Use the following settings to export your film.

9. Press Render. Depending on the amount of images this might take a few minutes.
